ENERGY MANAGEMENT FORUM

Receive practical advice on how to reduce your energy costs and improve energy efficiency

This event will consider the fundamental elements of effective energy management together with the tools and techniques used within a business's energy journey, including procurement, energy management and energy reduction opportunities.

2 AUGUST 2012
AND
26 SEPTEMBER 2012

FREE **10AM-2PM**

About the Forum:

Join us at our free half-day forum and receive expert advice on how to measure, monitor and reduce your organisation's energy use and costs.

You will also receive tips on best practice, discover opportunities to make your business more sustainable and get your questions answered by industry experts.

What You Will Learn:

- The fundamentals of effective energy management
- How to assess your organisation's current energy management strategy
- How to reduce your environmental impact and costs
- Examples of best practice and opportunities for improvement

Who Should Attend?

Organisations looking to:

- Reduce energy costs
- Manage future energy risks
- Implement energy management strategies

Whether your organisation is just setting out on its energy management journey or looking for an impartial review of current energy strategy, this event will provide practical advice and tangible benefits.
