Batteries Compliance

Ensure Your Compliance

The Waste Batteries and Accumulator Regulations were introduced in 2009, with the aim of reducing the amount used batteries ending up in landfill and reducing the impact of heavy metals on the environment. The regulations require the collection, treatment and recycling of enough waste batteries to meet European targets.

How Can Valpak Help?

By joining our compliance scheme, we take on the responsibility for your compliance with the UK Batteries Regulations.

We help you every step of the way through the compliance process, providing comprehensive advice and support on your data submission via free training, online guidance and a dedicated Contact Centre with expert technical advisors.

If you need a little extra support you can even outsource the whole data submission process to our data experts. To find out more please contact us on 08450 682 572 or email info@valpak.co.uk

What Will it Cost Me to Join Valpak?

Everyone pays a set environment agency registration fee each year of £600 which goes direct to the relevant environment agency. Our annual membership fee covers the administration costs of running the scheme and providing our services.

Recycling levies are also charged to cover your share of the costs of collecting, treating and recycling enough waste batteries to meet the recycling targets set by the government.

Levies vary each year depending on the current costs for collection and treatment.

For a competitve quote please contact us on 08450 682 572 or email info@valpak.co.uk
