

Valpak specialise in providing recycling and waste management services to business, local authorities and the waste industry across the UK.

What is Our Recycling Service?

We are one of the leading providers of recycling and waste management services to UK businesses, offering you the ability to completely outsource your recycling and waste management activities.

We will work with you to minimise landfill and increase recycling, enabling you to maximise the value of your waste materials and avoid unnecessary environmental harm. We are accredited by the Environment Agency to generate PRNs from the waste we recycle helping you to offset your compliance costs.

Our Key Services Include:

- Complete waste collection and recycling services for UK businesses
- Recycling solutions for Local Authorities
- The supply of secondary raw materials to the reprocessing industry

What Materials Can We Handle?

Below are some of the more common materials we handle on behalf of our customers but we aim to provide a solution to whatever materials you have. Our free waste audit, carried out at your sites establishes where we can best help you.

- Glass
- Plastic bottles
- Metals, paper
- Cardboard
- Food waste
- General waste
- Waste batteries
- Waste electrical equipment

How Can Valpak Help Me?

Whether you need advice on setting up a new site or help to achieve your zero waste goals, our knowledge and expertise covers a myriad of materials from packaging to batteries and WEEE, enabling us to offer a total waste management service. We operate on a flexible basis, letting you outsource as much or as little of your recycling as you wish.

What Benefits Will I Get as a Valpak Customer?

- Fully managed, nationwide collection service
- Consistently competitive pricing ensuring low cost recycling
- Access to secure online collection and tonnage reports
- Access to established, worldwide markets for a broad range of materials
- All material movements are auditable for ease of reporting
- Generation of Packaging Waste Recovery Notes (PRNs) to offset your Packaging Waste obligations
