

Environmental Policy

Valpak's purpose is to create a sustainable waste-free world.

We are passionately committed to the continual improvement of our own environmental performance and that of our customers, through the smart, innovative environmental solutions we provide. Valpak has a positive impact on recycling and sustainability, in the UK and further afield.

Our effective environmental management system will facilitate the achievement of the following objectives:

- to comply with all applicable legislation and regulations and the requirements of our customers and any party having an environmental impact on Valpak
- to continuously improve operational efficiency and environmental performance through appropriate investment
- to improve our carbon footprint in line with our commitment to PAS 2060 through a variety of low carbon initiatives
- to ensure waste minimisation through regular monitoring of recycling and food composting initiatives
- to assess the environmental performance of our suppliers through supplier questionnaires
- to prevent pollution by ensuring that all suitable controls are in place and are regularly checked
- to communicate this Policy to all employees, and to the general public through the website
- to establish a framework for the senior management to set and review environmental objectives and targets on a regular basis. These objectives and targets will help Valpak to reduce its environmental burden to as low as is reasonably achievable

A handwritten signature in blue ink, appearing to read 'S. Gough', is placed over a light blue rectangular background.
