- Labelling requirements report

Eliminating the burden of complying with environmental legislation overseas.

If your business is an established or fast-growing UK based retailer operating in, or selling into, international markets, it may be obligated to comply with producer responsibility legislation in the countries in which it performs activities.

It is important that you understand the range of producer responsibility legislation that your business may be obligated to comply with. These obligations are complex and vary by country, service, methods of sale and thresholds.

Our International Compliance team can provide invaluable support, allowing you to grow your business globally whilst being confident that its overseas environmental compliance requirements are being met.

This support provides protection for your business and your brand against prosecution and reputational damage, adverse PR, plus negative impacts on your staff, customers, shareholders and ultimately your profit.

Our support

We offer a variety of services from international account management to fully outsourced data management. If you take our fully outsourced service, we will manage all your business's international compliance reporting obligations.

Our support includes:

- Identification of obligations worldwide
- Scheme registration
- Obligation calculations
- Collection of your packaging data (weights and product information) from your suppliers
- On-site weighing days
- Data submission directly to schemes
- Representation in audits
- Support with Plastic Tax requirements
- UK and international regulatory updates
- Data quality assurance
- Safe and confidential data storage secure to ISO 27001

Our comprehensive service also includes

- A dedicated account manager on hand to ensure data upkeep and manipulation for international submissions
- Webinars and regional seminars
- One-to-one support sessions
- Staff training
- Quarterly legislation update mailings
- Monitoring of emerging legislation

Why Valpak

We have over 20 years' experience in data management for clients across the world, along with a 100% UK compliance record.

Our International Compliance team is made up of 40 dedicated account managers, data consultants and technical experts and our team's knowledge and expertise on environmental regulations extends to all **195 countries**.

We submit **more than 3,200 international data declarations** annually including, but not limited to, packaging waste, waste electrical and electronic equipment (WEEE), waste batteries, textiles, and furniture.

Through Comply Loop, Reconomy's integrated global compliance solution, we combine our skills and expertise with our sister companies, RLG and Noventiz. They operate in-country Producer Responsibility Organisations across the globe, which means our joined-up approach enables us to maintain an extensive database of international legislative and compliance requirements.

Our service has been recognised by our customers, who have reported savings between £9.5k to £15k

3,200

data submissions annually worldwide under a variety of regulations

195

countries our knowledge of environmental regulations extends to

97%

of customers surveyed would recommend Valpak's International Compliance Service

Data Insight Platform - global waste legislation reporting software.

Our International Compliance service is underpinned by the UK's largest product and packaging database, which holds over 50 million SKUs.

This database drives our Data Insight Platform, a customisable, online reporting tool that provides full visibility of your product and packaging data at SKU and component level. This enables advanced cost modelling for current and future waste legislation reporting requirements.

Compliance cost modelling

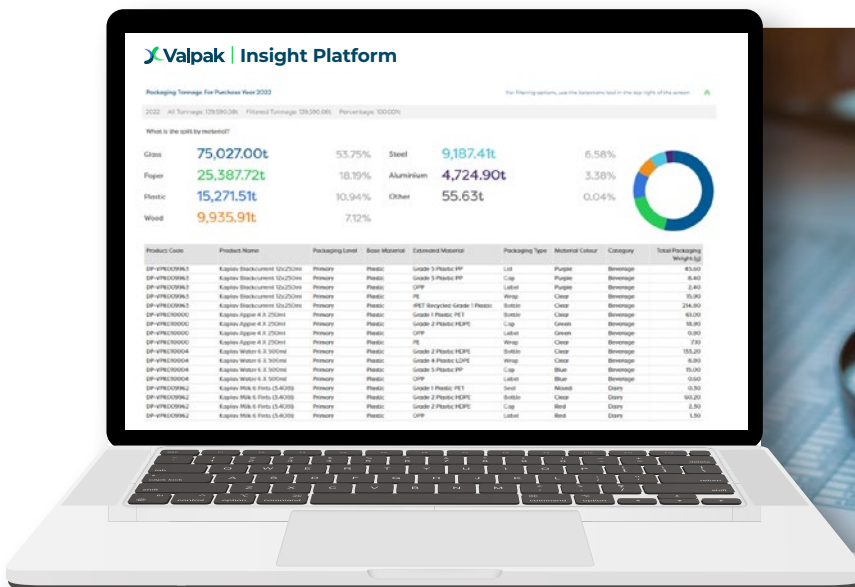

Displays the costs associated with global Extended Producer Responsibility (EPR) compliance submissions.

Detailed packaging data

Comprises modules that provide a comprehensive overview of packaging data, including information regarding material types, data sources, and component specifications.

CSR reporting

Automated reports can be sent monthly to all stakeholders to track progress against global Corporate Social Responsibility (CSR) targets.

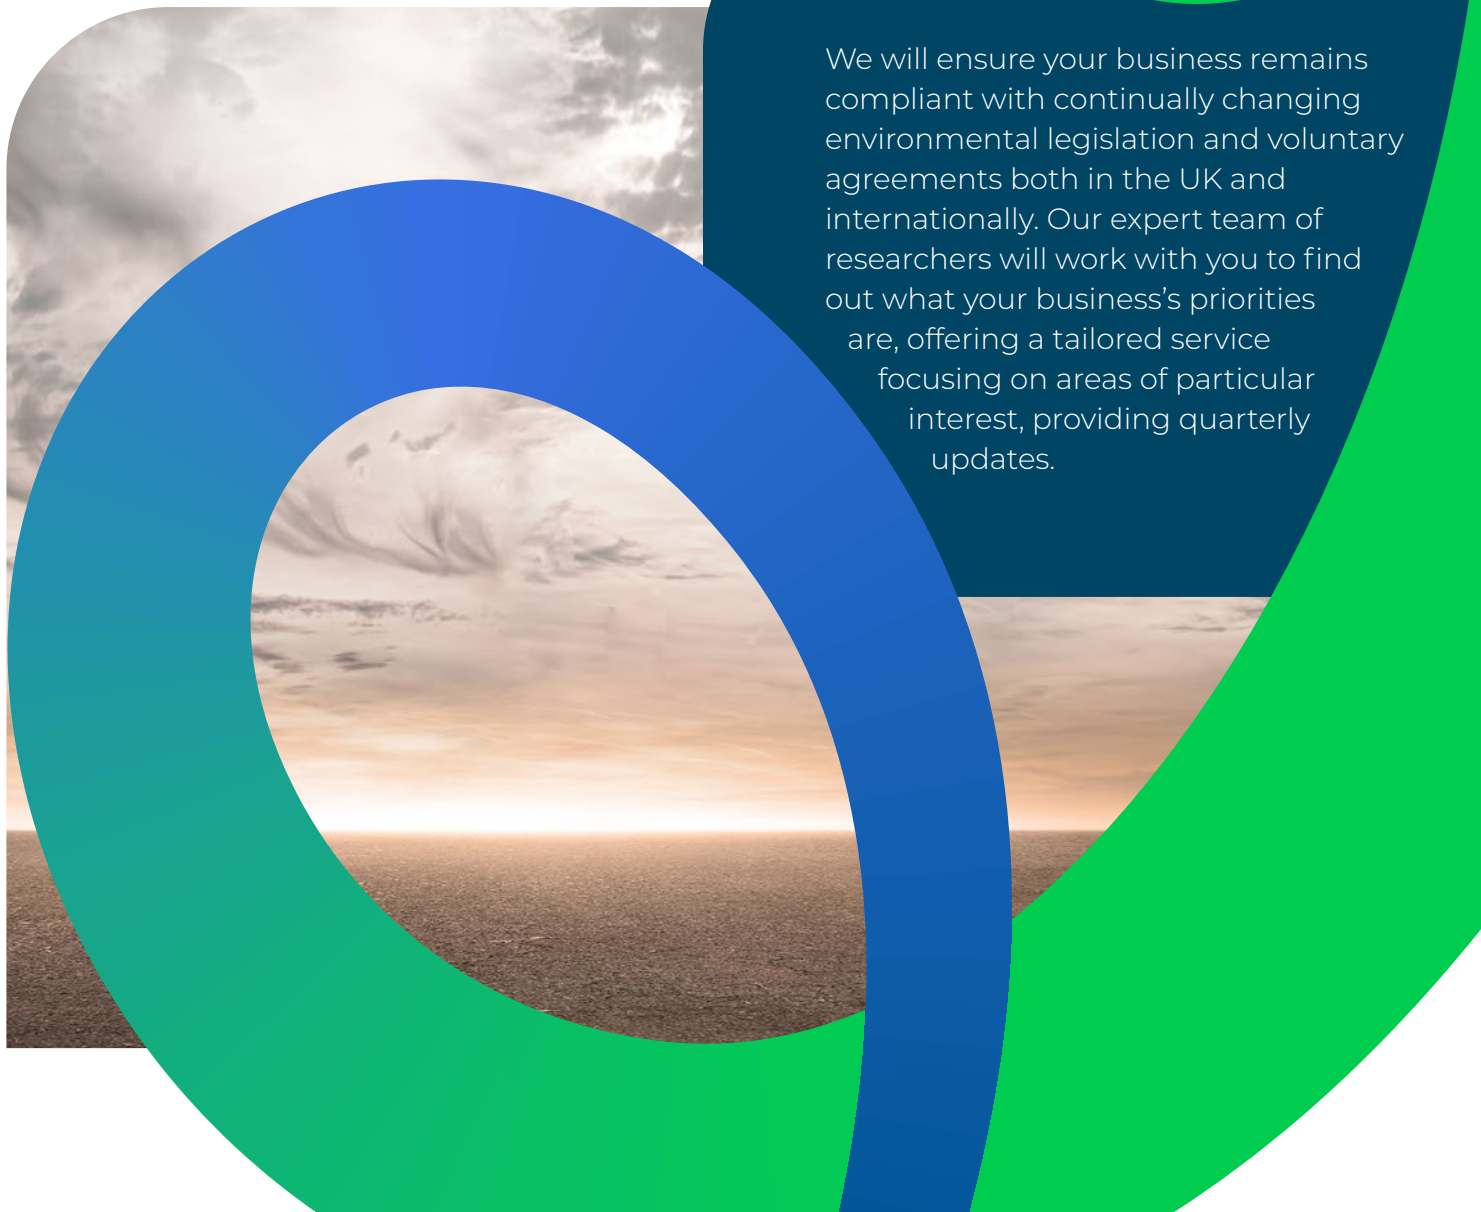

Beyond extended producer responsibility.

Horizon Scanning Service

If you wish to keep up to date with environmental legislation changes or emerging legislation or want to discover opportunities for reducing your business's environmental footprint in other countries, our team of expert consultants can provide further support via our value-added Horizon Scanning Service.

Our Horizon Scanning Solution keeps businesses up-to-date with environmental legislation changes across the globe!

We will ensure your business remains compliant with continually changing environmental legislation and voluntary agreements both in the UK and internationally. Our expert team of researchers will work with you to find out what your business's priorities are, offering a tailored service focusing on areas of particular interest, providing quarterly updates.

What our customers have to say.

ASOS

“For the past 4 years Valpak has been our first port of call for expert advice on waste compliance. The Valpak International Compliance team have provided invaluable support, allowing us to grow our business globally whilst being confident that our overseas compliance requirements are being met. We've really appreciated Valpak's knowledge and commercial understanding and would recommend their services.”

WD-40

“The horizon scanning report offered by Valpak has been an invaluable asset to our business, allowing us to keep track of upcoming changes and requirements in the extended producer responsibility landscape. We have been able to communicate country-specific requirements to our European offices and prepare and keep on top of any changes.”
