

Experts in EPR reporting and sustainable packaging.

Valpak specialise in EPR data collection, management and reporting which can help identify cost savings and environmental impact reduction.

Introduction

Valpak provides customers with access to high-quality data and streamline reporting processes.

Customers benefit from Valpak's long established Data Management and Insight services, which are underpinned by a robust packaging and product database, containing over 50 million SKUs, and extensive expertise in data handling.

With reforms to the Danish Packaging Waste Regulations now requiring obligated producers to report on the quantities of packaging put on to the market, Valpak's Data Management and Insight services can support businesses with this new responsibility.

This allows you to:

Identify potential cost savings

Highlight opportunities for eco packaging design and carbon footprint reduction

Reduce administrative burden while creating accurate data

Key deliverables and benefits

Regulatory reporting

- Gather and manage validated packaging data
- Calculate compliance obligations
- Complete compliance reports in line with regulatory requirements

Cost modelling & analysis

- Forecast future compliance costs
- Analyse costs to determine largest contributors
- Develop strategies to mitigate compliance costs
- Model financial impact of regulatory changes

Sustainability target tracking

- Develop and set packaging sustainability goals
- Track progress via our Insight Platform
- Identify and act on areas preventing you from achieving goals

Simplifying complex data and compliance reporting

Our Data Services exist to make things simple. We'll collect the data and then provide you with analysis and insight to allow you to make meaningful change.

We can:

- Collect data from your suppliers via our Data Hub
- Store and manage data within our internal product and packaging database to ease the burden of managing data
- Provide detailed insight of the packaging your business handles, helping to analyse packaging to reduce weights and improve design
- Support your company's sustainability goals

Valpak Data Hub

Gathering data from your suppliers

Our Data Hub is an online tool that will efficiently gather packaging data from your suppliers. The hub is equipped with a comprehensive set of automated checks to guarantee the accuracy of all data being collected for your dataset.

The Data Hub enables us to collect a wide range of metrics including:

- Packaging weights
- Material types
- Recycled content percentage and evidence
- Detailed data required for packaging EPR reporting

This tool helps our customers future proof their data ready for reporting requirements under reforms to the Danish Packaging Waste Regulations by collecting data on, for example sustainability, certification, and recyclability.

Products

You are required to submit weights information for each of the products listed. If you have previously provided these weights to Valpak, this may be prepopulated. Where weights have not been previously provided, we will prepopulate the base material and level we would expect to see for this product. Please review this information and make any necessary changes. Where weights have not been previously provided, we will prepopulate the base material and level we would expect to see for this product. Please review this information and make any necessary changes. Where weights have not been previously provided, we will prepopulate the base material and level we would expect to see for this product. Please review this information and make any necessary changes.

You can search for products by category, name, or code. To edit an individual product please click 'edit' within the relative section. Once you have made changes, you can either submit all changes in bulk using 'Submit All Changes' or individually within the products Packaging Profile. If you need to remove a product from the list, please tick the box to the right of the individual product line, and then select 'Remove Product(s)'.

Any products Awaiting Submission have not yet been submitted to Valpak. You can use the Awaiting Submission filter to view all products that have not been submitted; this can be cleared to view the full product list. The first 20 products are displayed below, however please check the other pages. You can come into this survey and make changes to product information at any time until a new survey is opened for this customer.

Valpak Insight Platform

Global EPR reporting software

Customers report annual average cost savings of **88.000 kr**

The Insight Platform is a customisable, online reporting tool that provides full visibility of your packaging data at SKU and component level. This enables advanced cost modelling for current and future legislation reporting requirements.

Compliance cost modelling

Offers sophisticated cost modelling features to address both current and expected legislative reporting obligations. Using modelled compliance levies, the Platform provides accurate packaging cost forecasts at a detailed level.

Detailed packaging data

Comprises modules that provide a comprehensive overview of packaging data, including information regarding material types, data sources, and component specifications.

CSR reporting

Automated reports can be sent monthly to all stakeholders to track progress against Corporate Social Responsibility (CSR) targets.

Our comprehensive service also includes

- A dedicated account manager on hand to provide ongoing support, identify requirements and produce specific reports at any point
- Team training on how to use the Platform
- Packaging compliance reporting audit support

Packaging optimisation

If you are looking to assess and reduce the environmental impact of your business's products or packaging, we can provide additional support:

Packaging analysis

Benchmark your business's packaging against the competition and wider industry.

'What If' modelling

A before and after comparison of your business's packaging data. The tool enables you to apply a set of hypothetical modifications to your packaging data to identify how changes can impact costs and tonnage.

Life cycle assessments

Understand the environmental impacts of your product packaging over the entire life cycle.

Packaging technology consultancy

We can help your business to make positive, cost-effective change to packaging to improve environmental performance.

What our customers have to say

Tesco Stores Limited

“Tesco highly recommend the Insight Platform for anyone looking to get significantly increased value from their packaging data and is delighted to have supported Valpak in its development.”

Arla

“The partnership between Arla and Valpak has never been stronger. Valpak has been instrumental in transforming our compliance with the various Packaging Waste Regulations. The support, tools and service from the team of experts at Valpak has been first class and a breath of fresh air both in terms of reporting and, submissions. We look forward to many more years of building the partnership.”
