

Horizon Scanning

Stay in the loop with emerging global
environmental legislation and voluntary
agreements.

Stay ahead of the game.

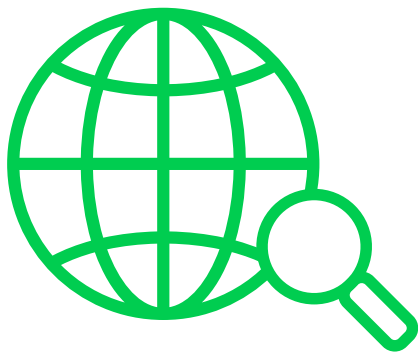

We take compliance seriously. As the UK's leading provider in the field, we are continually keeping our finger on the pulse of upcoming environmental legislation from across the globe. Our dedicated team works tirelessly to ensure that our customers are always ahead of the game, prepared for any changes that may impact them. With our Horizon Scanning service, we offer exclusive access to our extensive knowledge and expertise. Stay informed with our quarterly updates on how the environmental compliance landscape is evolving in the areas that matter most to your business.

Our support.

Once you have subscribed to our Horizon Scanning service you must then select the continents you want to receive updates on:

- Europe
- North America
- South America
- Africa
- Asia
- Antarctica
- Australia

You will then receive packaging waste, waste electrical and electronic equipment (WEEE) and waste batteries legislation updates, including waste legislation symbol requirements, for the selected continent(s).

In addition to our standard offering, we can provide updates on other environmental legislation, including:

Additional waste streams, such as toys, DIY and sports and leisure equipment

Plastic Tax

Deposit Return Schemes

Mandatory Carbon Reporting

Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) - EU only

The Restriction of the Use of Certain Hazardous Substances in EEE (RoHS) - EU only

Please note, additional topics outside our standard service will incur extra fees.

Our comprehensive service also includes

A dedicated account manager on hand to keep you updated

Quarterly update meetings

Quarterly reports tailored to modules of interest

Bespoke requirements.

Our dedicated team of consultants are ready to help with any enquiry, no matter how unique or specialised. Even if the information you are looking for is not covered in our Horizon Scanning modules, our Consultancy team can create a customised solution to suit your business's requirements.

Why Valpak.

Our International Compliance team is made up of **40 dedicated account managers**, data consultants and technical experts and our team's knowledge and expertise on environmental regulations extends to all 195 countries.

We **submit more than 3,200 international data declarations annually** including, but not limited to, packaging waste, waste electrical and electronic equipment (WEEE), waste batteries, textiles, and furniture.

Global compliance knowledge

Through Comply Loop, Reconomy's integrated global compliance solution, we combine our skills and expertise with our sister companies, RLG and Noventiz. They operate in-country Producer Responsibility Organisations across the globe, which means our joined-up approach enables us to maintain an extensive database of international legislative and compliance requirements.

What our customers have to say

“The horizon scanning report offered by Valpak has been an invaluable asset to our business, allowing us to keep track of upcoming changes and requirements in the extended producer responsibility landscape. We have been able to communicate country-specific requirements to our European offices and prepare and keep on top of any changes.”
