- 6 Why Valpak?
- 7 What our customers have to say.

## CBAM – An introduction.

**The EU Carbon Border Adjustment Mechanism (CBAM) introduces new reporting and taxation measures on carbon-intensive imports.**

Businesses must prepare to meet these regulatory requirements while staying competitive in a low-carbon economy.

# Understanding CBAM:

## What it means for your business.

CBAM is designed to prevent carbon leakage by imposing carbon costs on certain imported goods, aligning them with EU emissions standards.

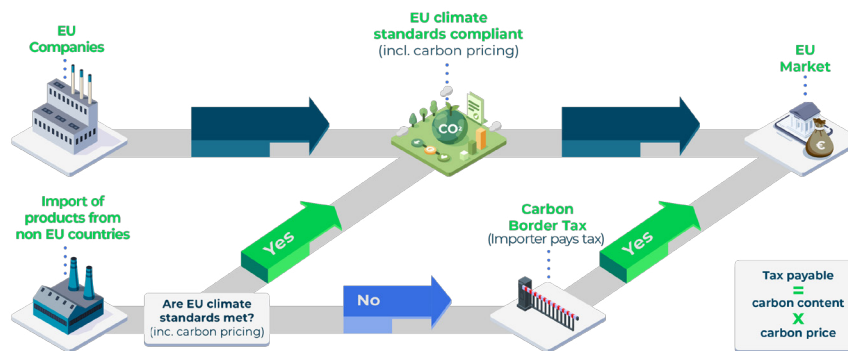

### Affected commodities include:

- Iron & steel
- Aluminium
- Cement
- Electricity
- Fertilisers
- Hydrogen

Companies importing these goods into the EU must report embedded carbon emissions and pay associated tariffs. Compliance will be phased in, requiring businesses to adapt quickly to new regulatory expectations.

### Affected groups include:

- **EU importers** – Report emissions and purchase certificates
- **Non-EU producers** – Monitor and disclose emissions data
- **EU consumers** – Request emissions data from suppliers

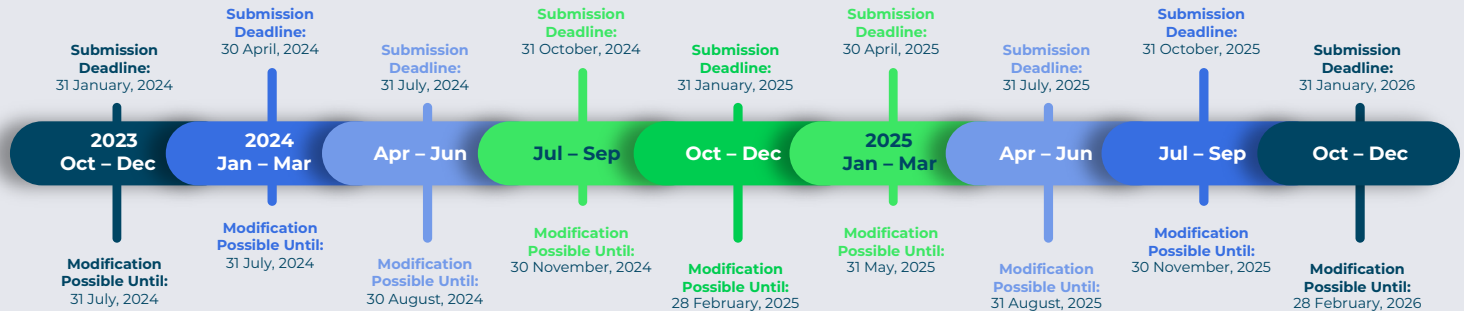

# Implementation timeline & key deadlines.

- **2023-2025** – Transitional phase: Importers must report emissions without financial adjustments.
- **2026 onwards** – Full implementation: Importers must pay for embedded emissions.

## Why act now?

- **Strict deadlines apply** – Late or inaccurate reporting could lead to enforcement actions.
- **Prepare early** – Collecting and verifying emissions data takes time.
- **Non-compliance is not an option** – Stay ahead of regulations to avoid substantial fines and disruptions.
- **Plan for modifications** – Submission errors can be corrected, but only within the set timeframe.

# Our CBAM support and expertise.

Navigating the EU CBAM can be complex, but we offer a comprehensive, hands-on approach from start to finish. We handle the entire submission process on your behalf:

- **CBAM compliance guidance**  
Ensure your business meets EU reporting and taxation requirements.
- **Carbon data collection, verification and reporting**  
Streamline emissions tracking, verification and submission.
- **Supplier engagement**  
Help suppliers understand regulations and calculate their emissions.
- **Regulatory readiness**  
Stay ahead of evolving carbon regulations to maintain market access.

## CBAM compliance guidance

- Clarify specificities
- Explain reporting Requirements
- Determine obligation

## Data collection, verification and reporting

- Gather and manage data
- Check data accuracy
- Complete data submissions

## Supplier engagement

- Inform suppliers of regulatory requirements
- Determine production chain emissions

## Regulatory Readiness

- Clarify regulatory updates
- Plan for big regulatory changes

## Beyond compliance:

### Our comprehensive Carbon Management services.

Even if your business is not directly obligated under CBAM, understanding and reducing your carbon impact is key to sustainability and long-term success.

Our Carbon Management services provide essential tools to measure, report, and improve your business's environmental footprint.

### Life Cycle Assessments (LCAs)

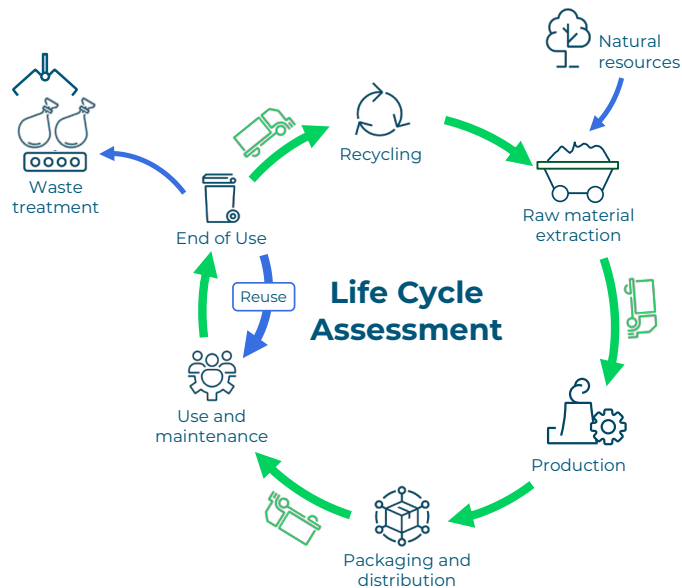

We analyse the environmental impact of your products from raw materials to end-of-life, helping identify emissions hotspots and reduction opportunities.

### Environmental Product Declarations (EPDs)

Providing transparent and verified carbon data for customers and stakeholders to support sustainable decision-making.

### Carbon Management Strategy

- Identify reduction strategies tailored to your operations.
- Enhance supply chain sustainability.
- Improve resource efficiency and cost savings.
- Meet customer and investor expectations for sustainability.
- Prepare for future carbon regulations beyond CBAM.

## Why Valpak?

- **Consultancy expertise**  
With decades of experience in environmental compliance, our consultants provide tailored guidance to help businesses navigate complex regulations.
- **Proven compliance excellence**  
Trusted by thousands of businesses, we ensure customers stay ahead of regulatory changes and avoid penalties.
- **Customer-focused approach**  
We prioritise our customers' success, reflected in our 97% customer satisfaction rate.
- **Expert regulatory knowledge**  
Our specialists help you interpret CBAM requirements and stay compliant.
- **Comprehensive Carbon services**  
From LCAs to supply chain engagement, we offer end-to-end solutions.
- **Tailored business support**  
We provide customised strategies to fit your industry and operational needs.
- **Proactive sustainability approach**  
Position your company as a leader in carbon management and sustainability.

## What our customers have to say.

---

Valpak has proven to be an **invaluable partner** in helping us **negotiate the complexities of CBAM** (Carbon Border Adjustment Mechanism) reporting.

“ Navigating the complicated requirements of CBAM was a daunting task, but **Valpak’s expertise made the process seamless and efficient**. Their team were able to remove the burden of an intricate reporting process by completing it on our behalf and **ensuring our compliance with the regulations**. ”
